

UNDERWATER LED LIGHT MARINER ULL-720

The ULL-720 underwater work LED Light is an excellent solution, where small size and high performance are required.

The high quality anodized aluminum body, provides pressure and shock durability and provides long life over daily hard conditions operation.

The small size and light weight makes it perfect to be attached to divers gear, R.O.V.s, cameras or any other application you may need, while the strength and high quality of lighting is granted.

The ULL-720 underwater work LED Light, 35 Watts of power, operates to a variety of power supplies within 12 - 36 Volts DC, providing 3700 Lumen of great quality dimmable Led lighting.

However, if your needs are different, we can always deliver custom orders, according to your demands, choosing among 10 up to 120 Watts of power and a variety of angles within 16 – 70 Degrees.

The high lighting performance of LEDs (more than twice comparing to halogen lights) and the low consumption, allows significant longer battery based operation and eliminates the need of thick power cables.
